**EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

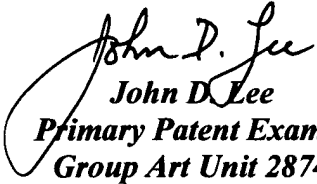

The following is an Examiner's Statement of Reasons for Allowance: After careful study of the claims and the previously applied Thompson reference, the Examiner agrees that the claimed high power Doherty amplifier circuit would not have been obvious in view of Thompson as previously proposed. The Examiner is in full agreement with applicant's reasoning as set forth on pages 6-8 of the January 24, 2006, response. Specifically, the Examiner (1) agrees that the control circuit mentioned in the previous rejection (Thompson, column 2, lines 52-64) does not, in fact, provide dynamic controlling of amplification class parameters of the peak and carrier transistors; and (2) agrees that Thompson does not disclose or suggest artificial transmission lines connected in the manner now set forth in the claims. Further search has uncovered no additional relevant prior art. The previously applied prior art rejections based upon Thompson are therefore withdrawn, and claims 1-10 and 12-17 are hereby allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
